Phil's Corner

On May 18, 1980, Mt. St. Helens blew. The associated earthquakes, explosions, ash columns and mud flows were the deadliest and most destructive volcanic eruption in U.S. history. It was spectacular!

Photo by Austin Post

For 10 hours ash spewed 15 miles high; 540 million tons of ash spread over 16 states & provinces. My cousins in Wallace, Idaho, remember roads closed with ash. They shoveled it with snow shovels and slid on the greasy mess when it rained.

My sister-in-law, Virginia Dale, was a Ph.D. student at the Univ. of Washington. She joined early research teams to the blast site, and implemented a long term

study of the debris avalanche field. Every 5 years Virginia and her team return for follow-up research.

Due to covid, the 2020 team is two years late, and Joseph and I are joining them! We're camping in a wilderness where few visitors are allowed. I'm psyched!

To hear more about Virginia's research, here's a link: <http://scarc.library.oregonstate.edu/omeka/exhibits/show/forestryvoices/item/35338>

I'll have more to report when we return. Until then, say a prayer for our team's safety. And lend Tama a hand if you get a chance. God Bless,

Phil

HELP STOP AQUATIC HITCHHIKERS!

Avoid spreading aquatic invasive species.

Recommended Actions:

- ✓ **CLEAN** boats, trailers and equipment
- ✓ **DRAIN** live wells, bilges and all water
- ✓ **DRY** boats and equipment
- ✓ **DISPOSE** of unwanted bait in the trash

IT'S THE LAW

Violation of the law is a state civil infraction. Violators may be subject to fines.

- Do not launch a watercraft or place a trailer in the water if aquatic plants are attached.
- Do not release unused bait into the water.
- Do not transport water over land in bilges and live wells.
